Driving Safety & Electrical Safet Tips - Rainy Season

Driving Safety Tips - Rainy Season

- First and foremost: slow down! It takes longer to stop or adjust in wet weather
- Stay toward the middle lanes - water tends to pool in the outer lanes
- Drive on the tracks of a vehicle ahead of you
- Don't follow large trucks or buses too closely. Their tiers splash water that ultimately obstructs your vision
- Be more alert . Watch out for brake lights in front of you
- Turn your headlights on even in a light rain, or in gloomy, foggy or overcast conditions
- Replace old or brittle wipers
- Avoid off-road driving
- Never drive beyond the limits of visibility
- Never drive through moving water if you can't see the ground through it; your car could be swept off the road
- When driving through a puddle of uncertain depth, go slow. If it's deeper than the bottom of your doors, turn around and find another route
- If possible, stay off the road during heavy thunderstorms
- If possible, go for Car Pool approach
- Always stay in touch with Weather page / radio channel / news bulletin

Before You Move!

- Make sure that your vehicle parts / accessories are in working condition
- Make sure that you have enough Fuel in your fuel tank

Driving Safety & Electrical Safet Tips - Rainy Season

Electrical Safety Tips - Rainy Season

- Stay away from electricity poles, PMT's and Sub Stations.
- Stay away from accumulated water around electrical installations
- Don't attempt to repair electrical system or pull tree limbs off lines.
- Portable generators should be installed separately from service connection.
- Isolate entire office electrical service lines before switching on Electric Generator.
- Don't touch wet electrical switches.
- Do not touch switches on poles for street lights
- Do not tie motorcycles or bicycles to electricity poles
